Amany Elshahat Mohamed Elkhadrawy

Frontend Developer Intern | UI/UX Design Intern

01030774851 | amanyelkhadrawy283@gmail.com | Menouf-Egypt
Portfolio: [Figma or Portfolio Link] | GitHub

Professional Summary

Final-year Computer Science student with project-based experience building responsive websites with HTML5, CSS3, JavaScript, and React.js. Skilled in UI/UX design with Figma, including wireframing, prototyping, user flows, and design systems. Additional background in software testing with Selenium WebDriver, TestNG, and manual test design.

Education

Higher Institute of Technology (HTI)
Computer Science | Final-Year Student | Expected Graduation: 2027
Grade: A | GPA: 3.58 out of 4.0

Technical Skills

Frontend Development: HTML5, CSS3, JavaScript, TypeScript, React.js (Hooks, React Router, Context API), Next.js, Tailwind CSS, Bootstrap, Sass/SCSS, REST API Integration, Responsive Web Design

UI/UX Design: Figma (Auto Layout, Components and Variants), UI Design, UX Design, Wireframing, Prototyping, User Flows, User Research, Information Architecture, Usability Testing, Design Systems

Tools: Git, GitHub, Chrome DevTools, Postman, Jira

Software Testing: Test Case Design, Functional Testing, Bug Reporting, Defect Tracking, Java, Selenium WebDriver, TestNG, Page Object Model (POM)

Databases: SQL Queries, Database Testing

Projects

LinkedPosts – Social Media Web Application
Technologies: React.js, JavaScript, Vite, React Router, Redux, Context API, Tailwind CSS, HeroUI, Axios
GitHub: **LinkedPosts**.

- Developed a responsive social media web application featuring user authentication, a posts feed, user profiles, post details, and comments.
- Implemented protected routes and integrated REST APIs for authentication, posts, comments, profile data, and password management.
- Built reusable UI components and managed application state using React Context and Redux.

Restaurant Website – Frontend Development
Technologies: HTML5, CSS3, JavaScript
GitHub: restaurant-website

- Built a responsive restaurant website with HTML5, CSS3, and JavaScript to deliver an interactive, visually appealing user experience.
- Organized the project into separate CSS, JavaScript, and image folders.

Savory Delights – Frontend Development
Technologies: HTML5, CSS3
GitHub: savory-delights

- Built a restaurant website focused on page structure, styling, and visual presentation, with styles organized into separate main and media stylesheets.

Swag Labs (Sauce Demo) – Automation Testing
Technologies: Java, Selenium WebDriver, TestNG, Page Object Model (POM), Maven
GitHub: Swag-Labs

- Developed automated UI test scripts in Java with Selenium WebDriver for an e-commerce demo application, structured with the Page Object Model and executed with TestNG.

Guru99 Website Testing – Manual Testing
Technologies: Manual Software Testing

- Performed manual functional testing on the Guru99 website, designing test cases and test scenarios and reporting bugs.
